WEBSITE:-

<https://www.jaguarlandrover.com/>

The image shows the homepage of the Jaguar Land Rover website. At the top, there is a navigation bar with the JLR logo, followed by links for COMPANY, BRANDS & SERVICES, INNOVATION, PEOPLE, RESPONSIBILITY, INVESTOR RELATIONS, NEWS & MEDIA, and a search bar. Below the navigation is a large, dark brown banner with the word "REIMAGINE" in white capital letters. Underneath it, the text "IS OUR ROADMAP FOR THE FUTURE" is visible, along with a "LEARN MORE" button.

INTRODUCTION:-

In this project, the client wished to move all of his offline and online business operations. For appointment scheduling, payment options, loan procedures, test drives, etc., where users can complete all of these tasks via websites, we created the type of website where clients can manage all the tasks with ease and it also has advantages for users.

THE WEB TIME IT SOLUTIONS

The screenshot shows the admin dashboard for KHWV (Khodiyar World Vision). The left sidebar includes links for DASHBOARD, EMPLOYEE, SOCIETY, HOUSE, EMPLOYEE & HOUSE, LOGS, and REPORT. The main area displays a welcome message 'Hey Rahul! WELCOME TO KHWV!' with a profile icon. It shows statistics: 5 Employees, 104 Societies, 751 Houses, and 0 Today's Collection. Below this is a table titled 'Employers Collection' for JIGAR BHAI, showing totals for houses, rent, baki, and jama.

EMPLOYEE NAME	TOTAL HOUSES	TOTAL RENT	TOTAL BAKI	TOTAL JAMA
JIGAR BHAI	751	184470	264770	380

PROJECT GOAL:-

He owns a GTPL Box Channel business, employs close to 5 to 6 people, and has more than 3500 GTPL Box connections in homes. He had an offline business, thus the issue was that his employee had to visit each and every customer's home daily to collect the rent for the entire month of delivering a channel on the TV. Each employee must enter every entry into an Excel file and figure out if the consumer paid the whole rent or not because there are close to 800 properties for him to collect money from. Every day, he must oversee everything, including how much money comes from society or the house's rent for the day, among other things.

WEBSITE:- <https://kwv.co.in/>

SKILLS:-

- Vuejs
- Vuetify
- Laravel
- RESTful API
- SQL
- AJAX
- Database Management

SOLUTION:-

we created one admin panel where the owner of the business can log in he can add employee's details and allocate societies and houses to each employee can log in with their id and password and on the employee's dashboard they can see how many societies and houses allocated to them how much they have to collect and how much money they already collected. After Admin can see all the things on his dashboard that how many employees are working and how much society I allocate to particular employees how much money he has to collect, how much he already collected, and how much money is still remaining to collect of particular employee. Admin can get notification of each collection, he can see how much money collected by my employee. I also put one option in the report where the admin can select the employee's name and enter the date so from this date to that date this employee how much he collects the money after he can download it as an Excel file. I convert his business into automation so the admin can handle or check his whole business from anywhere and he can handle the issue from the admin panel.

THE WEB TIME IT SOLUTIONS

INTRODUCTION:-

At DIEV, our mission is to revolutionise urban mobility by providing cutting-edge electric two-wheelers that are not just vehicles, but symbols of sustainability and innovation. We strive to offer eco-friendly transportation solutions that enhance the lives of our customers while contributing positively to the environment.

SKILLS:-

- BootstrapVue
- PHP
- Laravel
- RESTful API
- SQL
- Query Optimization
- Vuejs
- Vuetify
- AJAX
- CSS
- JavaScript
- Database Management

KEY ROLE & FEATURES:-

Innovation: Continuously innovate and upgrade our electric vehicles, integrating the latest advancements in display technology, battery efficiency, and motor performance to exceed customer expectations.

Accessibility: Expand our reach across India, making our electric two-wheelers accessible to a wider audience while ensuring affordability without compromising quality.

Our vision: Our vision at DIEV is to lead the electric mobility revolution in India and beyond. We envision a future where our electric two-wheelers are the preferred choice for commuters, offering superior performance, advanced technology, and a seamless riding experience. We aim to create a world where clean and efficient transportation is accessible to all.

our goal: Strive to reduce our carbon footprint by promoting electric vehicles as a sustainable alternative to traditional gasoline-powered transportation.
